Problem – Solution Fit Template:

The Problem–Solution Fit for AutoSage demonstrates that the system addresses a real and recurring problem faced by vehicle buyers. Customers experience confusion, information overload, and uncertainty when researching vehicles due to scattered data sources, technical complexity, and inconsistent comparisons. AutoSage provides a structured, AI-powered multimodal solution that simplifies vehicle research through image-based identification and conversational automotive guidance. The solution directly reduces research time, improves clarity, and enhances confidence in high-value purchase decisions.

Purpose:

❑ **Solve complex problems in a way that fits the state of your customers.**
AutoSage simplifies fragmented automotive information into structured, easy-to-understand insights tailored to users with varying technical knowledge levels.

❑ **Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.**
AutoSage integrates with existing user behavior such as online searches, vehicle comparisons, and review analysis, while enhancing it through AI-powered assistance.

❑ **Sharpen your communication and marketing strategy with the right triggers and messaging.**
The system focuses on real buyer triggers like budget planning, vehicle comparison, maintenance concerns, and EV exploration, providing precise and decision-oriented outputs.

❑ **Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.**
By addressing frequent frustrations such as unclear resale value, maintenance uncertainty, and time-consuming research, AutoSage builds trust and encourages repeated usage.
