Functional & Performance Testing Template

Model Performance Test

Date	17 Feb 2026
Team ID	LTVIP2026TMIDS91131
Project Name	AutoSage App Using Gemini Flash
Maximum Marks	

Test Scenarios & Results

Functional Testing

Test Case ID	Scenario (What to Test)	Test Steps (How to Test)	Expected Result	Actual Result	Pass/Fail
FT-01	Analyze Button Visibility Without Image	Do not upload any image	"Analyze Vehicle" button should not be visible	Button not displayed until image upload	Pass
FT-02	Invalid File Format Upload	Upload non-image file (.pptx)	System rejects file and shows error	Error message displayed for unsupported format	Pass
FT-03	Supported Image Upload	Upload valid JPG/PNG vehicle image	Image should render correctly	Image rendered successfully	Pass
FT-04	Motorcycle Image Analysis	Upload Royal Enfield image and click Analyze	Vehicle type, engine capacity, maintenance level displayed	Accurate structured vehicle output generated	Pass
FT-05	SUV Image Analysis	Upload SUV image and click Analyze	Brand detected, model estimated, mileage and price displayed	Structured vehicle report generated	Pass
FT-06	Non-Vehicle Image Handling	Upload image without	System should detect	Proper message displayed	Pass

		vehicle (e.g., cricket players)	no vehicle and request valid image	requesting vehicle image	
FT-07	Budget-Based Recommendation	Enter “Best bikes under 2 lakhs” in chat	2–4 models with price, mileage & verdict	Structured recommendation provided	Pass
FT-08	Vehicle Comparison Query	Enter “Compare Nexon and Brezza”	Price difference, mileage difference, pros & cons	Structured comparison generated	Pass
FT-09	Seasonal Maintenance Advisory	Enter “Winter car maintenance tips”	Tire, battery & fluid checks suggested	Practical structured maintenance advice generated	Pass
FT-10	Domain Restriction Validation	Enter non-automotive query (“watches under 5k”)	System politely restricts response to automotive domain	Assistant declined and redirected to automotive topic	Pass

Performance Testing

Test Case ID	Scenario (What to Test)	Test Steps	Expected Result	Actual Result	Pass/Fail
PT-01	Image Analysis Response Time	Upload vehicle image and measure time	Stable response within acceptable time	Avg 8–12 seconds	Pass
PT-02	Chat Assistant Response Time	Send text query and measure time	Stable response within acceptable time	Avg 7–10 seconds	Pass
PT-03	API Stability Testing	Perform multiple consecutive uploads & queries	No crash or session reset	System handled repeated API calls successfully	Pass
PT-04	Session Stability	Use assistant continuously for extended time	Session state should persist	Session state maintained without reset	Pass

PT-05	System Reliability	Observe UI during API call	No freezing; loading indicator shown	UI responsive with spinner displayed	Pass
PT-06	API Quota Handling	Exceed API usage limit	Proper error message displayed	Quota error handled correctly	Pass
