Acceptance Testing
UAT Execution & Report Submission

Date	18 Feb 2026
Team ID	LTVIP2026TMIDS91131
Project Name	AutoSage App Using Gemini Flash
Maximum Marks	4 Marks

1. Purpose of Document

The purpose of this document is to summarize the test coverage, validation results, and system stability of the **AutoSage** application at the time of release to User Acceptance Testing (UAT).

This report confirms that the image-based vehicle analysis module and conversational assistant module were tested thoroughly and are functioning as per defined requirements. It also highlights defect analysis and test case completion status prior to final submission.

2. Defect Analysis

2.1 Functional Coverage Summary

Section	Total Cases	Not Tested	Fail	Pass
Image Analysis Module	6	0	0	6
Chat Assistant Module	4	0	0	4
Performance & API Handling	6	0	0	6
Session & Error Handling	3	0	0	3
Total	**19**	**0**	**0**	**19**

2.2 Bug Resolution Summary

Since this project was developed in a controlled environment and issues were resolved during development, no unresolved production-level defects remain.

Resolution Type	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
Fixed During Development	0	2	3	2	7
By Design (Expected Behavior)	0	1	1	0	2
Duplicate	0	0	0	0	0
Not Reproduced	0	0	0	0	0

Won't Fix	0	0	0	0	0
Totals	**0**	**3**	**4**	**2**	**9**

3. Test Case Analysis

This report shows the number of test cases that have passed, failed, and untested

Module	Total	Not Tested	Fail	Pass
Image Upload & Validation	3	0	0	3
Vehicle Image Analysis	3	0	0	3
Chat Recommendation & Comparison	3	0	0	3
Maintenance Advisory	1	0	0	1
Domain Restriction Handling	1	0	0	1
Performance Testing	3	0	0	3
API Stability & Session Handling	2	0	0	2
Total	**16**	**0**	**0**	**16**

4. UAT Conclusion

The AutoSage application successfully passed all functional, performance, and stability test scenarios.

- Image-based vehicle identification generates structured and accurate reports.
- Conversational assistant provides reliable recommendations, comparisons, and maintenance guidance.
- Domain restrictions ensure the assistant remains within automotive expertise.
- API integration remained stable under repeated usage.
- No critical or high-severity defects remain open.

The system is considered **stable, reliable, and ready for deployment/release**.
