Project Design Phase-II
Data Flow Diagram & User Stories

Date	07 Feb 2026
Team ID	LTVIP2026TMIDS91131
Project Name	AutoSage App Using Gemini Flash
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story No.	User Story / Task	Acceptance Criteria	Priority	Release
Customer (Web User)	Image-Based Vehicle Analysis	USN-1	As a user, I can upload a vehicle image in JPG, JPEG, or PNG format.	Image is successfully uploaded and previewed on screen.	High	Sprint-2
		USN-2	As a user, I can analyze an uploaded vehicle image.	Structured vehicle report (Brand, Model, Mileage, Price, Maintenance, Resale Value) is displayed.	High	Sprint-2
		USN-3	As a user, I receive a validation message if no image is uploaded.	System shows “No file uploaded” error message.	Medium	Sprint-2
Customer (Web User)	Conversational Automotive Assistant	USN-4	As a user, I can enter vehicle-related queries in natural language.	Assistant generates structured automotive response.	High	Sprint-2
		USN-5	As a user, I can request budget-based vehicle recommendations.	Assistant provides 2–4 relevant vehicles within the specified budget range.	High	Sprint-2
		USN-6	As a user, I can compare two or more vehicles.	Assistant displays structured comparison including price, mileage, pros & cons.	High	Sprint-2
		USN-7	As a user, I can receive seasonal vehicle maintenance advice.	Assistant provides structured maintenance guidance.	Medium	Sprint-2
		USN-8	As a user, I can get EV/Hybrid suggestions.	Assistant provides eco-friendly options with range and cost insights.	Medium	Sprint-2

Customer (Web User)	Session Management	USN-9	As a user, I can switch between Image Mode and Assistant Mode.	System successfully switches modes without crashing or resetting session unexpectedly.	High	Sprint-2
		USN-10	As a user, I can view chat history during the session.	Previous conversation messages remain visible until session ends.	Medium	Sprint-2
Customer (Web User)	Error Handling	USN-11	As a user, I receive a friendly error message if the AI fails to generate a response.	System displays meaningful error notification instead of crashing.	Medium	Sprint-3
		USN-12	As a user, I receive an error message if API quota or connection fails.	System handles API exceptions gracefully and informs the user.	Medium	Sprint-3
